

How is the database constructed?

Stage 1

Applications received for the IWD Project are evaluated according to the criteria by Egon Zehnder and successful applications are added to the database.

Stage 2

Applicants are sent information regarding the status of their application is sent to applicants by the Project Office.

Stage 3

Candidates in the database are classified based on their credentials and face-to-face interviews.

Stage 4

Through the SU-EZ matching methodology, appropriate candidates on the database are determined based on the demand and needs of the companies.

Stage 5

After the matching, the candidates are introduced to the companies within the candidates' acknowledgment.
