Corporate Governance Forum's Projects Related with Women on Boards

Independent Women Directors (IWD) Project

Sabancı University Corporate Governance Forum (CGFT), in strategic partnership with Egon Zehnder International (EZI) Türkiye, initiated the "Independent Women Directors (IWD)" project in 2012. The initiative was motivated by the CMBT's (Capital Markets Board of Türkiye) ruling that came to force in January 2012 requiring 1/3 of the board members to be independent. Although the same ruling recommended inclusion of at least one female director, the result was dilution of boards with respect to women from 12.5% in 2011 to 11.5% in 2012, since companies increased their board size and predominantly appointed men as independent directors to comply with the ruling. IWD is a response to this unintended consequence of the ruling.

The IWD Project aims to encourage and help companies to consider female candidates when nominating independent directors. To this end, a database of qualified women is maintained. Each candidate application is evaluated against the criteria established by the Forum and EZI Türkiye. As of the end of October, 2023 IWD database has 324 board-qualified women. The women who are qualified for the IWD database are included in the Global Board Ready Women (GBRW) olarak database if they apply, without going through a separate assessment process.

In 2013, CMBT revised its recommendation upon considering the draft proposed by IWD. Accordingly, the new clause 4.3.9 of the CMBT's current Corporate Governance Principles required the listed companies set a target rate for female board members of no less than 25% and a target date and establish a policy that will make it possible to reach these targets. The board is expected to evaluate and report the progress made in reaching the target on an annual basis. The ruling is based on the "Comply or Explain" approach and the companies who do not set a target must explain the reasons why they don't comply in their mandatory annual Corporate Governance Compliance Reports.

Since 2012, the IWD Project has helped a number of companies and investors, including IFC, to find suitable female board nominees. The Project also includes a shareholder initiative that makes use of mandatory electronic general assemblies in Türkiye to ask questions to the boards with all male boards about their gender diversity targets. Within the scope of the IWD project, researchers collect data on boards, analyze the trends, conduct academic research and disseminate the findings. Using the data collected, researchers calculate Women Empowered Boards Index developed by scholars at Sabancı Business School and award boards that score highest in various categories.

¹ Started by the European Business Schools/Women on Board Taskforce and supported by the European Commission, Forte Foundation and the Financial Times Non-Executive Directors' Club, Global Board Ready Women is a global initiative. The Global Board Ready Women searchable database has been created in an effort to identify and promote Senior Women Executives and Professionals.

30 Percent Club Türkiye

In 2010, the 30% Club campaign was founded by Dame Helena Morrissey in the UK and has since evolved into a global mission. In 2016, the efforts to establish 30% Club's Turkey Chapter was kicked off by Melsa Ararat and Murat Yeşildere as a spin off from Independent Women Directors Project, with Tayfun Bayazit, Ahmet Dördüncü, Humprey Hutton, Murat Özyeğin, Sani Şener and Ömer Yüngül as the founding members. The Chapter was launched at Borsa İstanbul in 2017. The Chapter is hosted and coordinated by Sabancı University Corporate Governance Forum since its inception. Currently the Chapter has 79 members.

The Club is a voluntary organisation of senior corporate professionals committed to making business better through diversity across more than 20 countries. Our members are the board chairs and CEOs but there are lots of ways for individuals and organisations to support our campaign to bring about change.

We believe that collaborative, concerted business-led efforts of senior professionals can help accelerate progress towards better gender balance at all levels of organisations. The 30% Club works to bring about real transformation by:

- Encouraging and supporting Chairs and CEOs to appoint more women to Board and senior management level
- Providing information for businesses trying to improve their diversity at all levels
- Harnessing public media support and leveraging social media.
- Creating and promoting research to help governments and institutions to direct their energies toward activities that drive change.

Board of Directors of the 30% Club Türkiye has set the following targets for the campaign:

Participation of women
in the boards of **BIST Star Market and**
Main Market companies by 2025

Women in the top executive teams
by the end of 2025 (representing
an increase of 100% from 15% in
2016)

Zero number of
all male boards amongst the
BIST-100 companies by 2025

These targets correspond to approximately a three-fold increase in the number of professional women on corporate boards from the current level considering that half of the women sitting on corporate boards today are members of controlling shareholder families.

GLOBAL CHAIR, 30% CLUB

It is encouraging to see the representation of women directors on BIST 100 boards increasing, albeit slowly - from 17.5% in 2022 to 17.9% in 2023.

Turkey has had a lot to contend with this year, including the devastation caused by the earthquakes in February. The 30% Club global campaign is so proud of the Turkish chapter's response to the crisis, convening its CEO and chair members with NGO leaders to discuss ways to support the affected regions, share best practices, and foster collaboration.

There are other challenges that make it hard for Turkey to see faster progress when it comes to getting more women into board positions and the C-suite, including the high proportion of family-owned private companies on the BIST. Primogeniture often dominates the value system of family businesses so women are frequently overlooked in succession planning.

This is the case in other countries, including Japan, where the representation of women at board level similar to Turkey's. As of the September 2022, the ratio of woman on the boards of directors of the TOPIX100 was 17.2%.

However, I was pleased to see the Women on Board in Turkey 2023 report reveal an increase in the number of BIST 100 female board chairs [41 in 2022 to 45 female board chairs in 2023]. It is also a positive development to see the percentage of independent female board members, especially in BIST 100 companies rising from 24.4% to 25.9%. This suggests more companies are recognising the value of having diverse and independent voices in decision-making roles.

Of course, there is clearly more work to do. The SPK's (Capital Markets Board of Türkiye) recommended minimum female director ratio of 25% is only achieved by 29.8% of all BIST and 24% of BIST 100 companies. This gap between recommendation and practice suggests that while there might be awareness of the guidelines, implementation and actual change are lagging.

The data revealed in this report underscores the importance of continued efforts and initiatives to promote gender diversity in corporate leadership roles. The motivation should be clear. There have been many studies linking diversity in leadership to financial outperformance. This includes McKinsey's 2019 analysis that showed finds companies in the top quartile of gender diversity on executive teams were 25% more likely to experience above-average profitability than peer companies in the fourth quartile.

I hope to see more Turkish companies act on this new analysis from Women on Board in Turkey 2023 and commit to gender equity in senior leadership in the years ahead. I would also like to thank the growing list of members of 30% Club Turkey for supporting our global cause of achieving beyond 30% female representation at board and C-suite level. We are here to support you.

SECTION 1 | INTRODUCTION

Since the launch of the “Women on Boards in Turkey” report series in 2012, the external environment for businesses has become increasingly complex. The recovery from the pandemic, a war in Ukraine and recently in Gaza, persistent global inflation and a reversal in democratization meant that unpredictability has become the norm. Against this backdrop, climate crises have deepened, and inequalities have worsened. Regrettably, the growth rate of the inclusion of women on boards has stagnated in developed markets for three consecutive years. A retreat of human rights and democracy goes hand in hand with masculine restoration in both private and public spheres.

In March 2023, just before the International Women’s Day, the data provider MSCI said the gender inequality will not be eliminated until 2038 if the current improvement in female representation is maintained. This prediction is pertinent to MSCI’s All Country World Index, consisting of the world’s largest companies. The estimates for all listed companies are around 10-20%, depending on which sample one selects.

Despite the generally accepted argument that gender diverse boards make different and better decisions when it comes to trade-offs between short term profit and sustainability, women continue to be excluded from the highest levels of corporate leadership with consequences, not only for companies, employees, investors and the economy in general but also for the society and environment.

The only exception to this picture is the EU, where mandatory board gender diversity quotas will be in effect by 2026. By 2026, companies will need to have 40% of the underrepresented sex (guess which it is), among non-executive directors or 33% among all directors. Today, 33.2% of board members in the EU’s largest listed companies are women, but with significant differences among states (ranging from 45.9% to 10.3%). Women occupy just 20% of board seats of the largest listed companies globally.

In 2021, for the first time since 2013, we had observed a reversal of the marginal improvements in the representation of women in the corporate boards of BIST companies. In 2022, there was a recovery, but nothing more. This stagnation was attributed to the lower percentage of women on the boards of companies that had their initial public offering (IPO) in 2021 and 2022 and a worsening status of women in general. The latter was evidenced by the declining I ranking of Türkiye in WEF’s Gender Gap Index, and incidences of femicides.

This 11th annual report reflects on the composition of the boards elected in 2023 General Shareholder Meetings with a cut of date of 31 August 2023. The time series data reveals painfully slow progress and represents the

manifestation of the idiosyncrasies of board dynamics in Turkey. We report a marginal improvement in percentages of women in corporate boards in Türkiye at 17.9%, compared to 17.5% in 2022. The lower representation of women in companies that offered their shares to the public for the first time than the BIST ALL average was again a negative factor, while Türkiye’s ranking in WEF Gender Gap Index dropped from 130 to 129, below the ranking in 2020 when Türkiye withdrew from Istanbul Convention. We reiterate what we said in our 2021 and 2022 report; women’s position in corporate boards are closely linked to the wider context in which companies operate.

In 2023, the board trends we have been reporting since 2012 have not changed. Boards have an average of 7 directors and independent members constitute 30% of the boards in compliance with the regulations, with a median of two independent directors. Women sit in 17.9% (617) of 3449 board seats. The ratio of female directors amongst independent directors continued to rise at a higher pace and reached 22.1%. Female independent directors are slightly more preferred as committee members than their male peers. Newly listed companies had only 14.0 % women on their boards worse than in 2022. Of the 45 new IPO companies 21 had all male boards. Investment banks continue to be poor advisors for IPO companies when it comes to board structure. 178 companies are run by a board who have no representation of women corresponding to 34.6% of all companies, up from 33.3% in 2022.

BIST 100 companies, Turkey’s largest, continued to disappoint, since 22 companies are still run by boards closed to women.

We hope that the EBRD-funded project that aims to develop strategies and tools to promote better representation of women on corporate boards and brings together both the rule makers and companies, will create a new, consensus-based impetus.

In 2023, the average percentage of women in 30% Club Türkiye members’ boards in listed companies exceeded 25%. 30% Club Türkiye Chapter, with its 79 leading CEOs and Board Chairs as its members, is committed, in solidarity with other chapters, to inspire their peers, influence those with power to drive change and enable future women leaders for creating a business environment free from discrimination and violation of human rights.

SECTION 2 | WOMEN ON BOARDS IN TÜRKİYE 2023

In 2023, CGFT researchers collected publicly available data on the board of directors and board committees of the companies listed in BIST, using the Public Disclosure Platform and company websites with a cutoff date of 30 September 2023. CGFT has been combining publicly available data on boards with hand-collected data on the attributes of the directors since 2013. This effort enables the categorization of directors into professional directors and affiliated directors who are members of the controlling families or direct shareholders. The objective of this categorization is to track the progress in the likelihood of professional women breaking the glass ceiling.

The analysis presented below represents the current picture and the trend in BIST companies with respect to gender diversity on boards between 2013-2023.

Overview of Board Seats

In 2023, there were 517 companies listed in BIST, the highest number since 2013. Accordingly, the total number of board seats reached 3449, compared to 3211 in 2022. Similarly, the number of independent board members reached 1147, the highest number since 2014 as seen in **Chart 2.1**. The average board size decreased to 6.5 from 6.8 in 2022 and 2021. The ratio of independent directors is 33.3 %, slightly higher than 32.6% in 2022.

In 2023, 477 women held 617 board seats, whereas 2236 men held 2832 seats as shown in **Table 2.1**. The percentage of women holding multiple directorships is 16.98 % (81 out of 477). The percentage of men holding multiple directorships is slightly lower at 15.97 % (357 out of 2236) than last year. Table 2.1 presents the numbers of board seats occupied by men and women in detail. **There are 47 male and 15 female directors who sit on more than 4 more boards.**

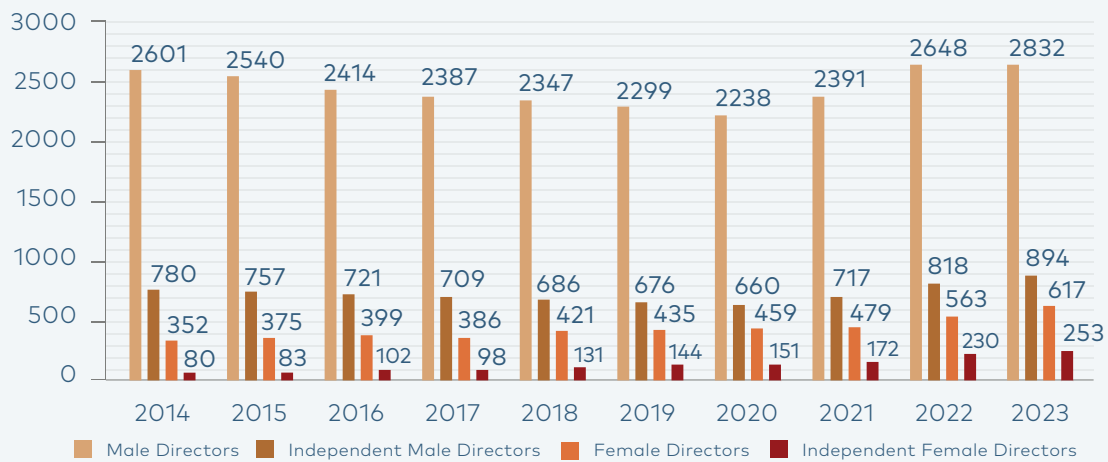

Table 2.1 Women and men holding multiple directorships in 2023

Number of Chairs	Number of Chairs									Number Of Individuals	Total Directorships
	1	2	3	4	5	6	7	8	9		
Female Directors	396	48	18	5	9	1	-	-	-	477	617
Male Directors	1879	210	100	23	12	7	2	2	1	2236	2832
All Directors	2270	261	118	28	21	8	2	2	1	2713	3449

Overview of Male and Female Board Seats in BIST

Chart 2.2 represents the change in the total number of board seats and the number of female and independent directors between 2014-2023. Out of 1147 independent directors in 2023, 253 were female. The ratio of female independent members within the total number of independent members has been increasing since 2013.

Chart 2.2 Number of Total Board Seats and Independent Directors Seats by Gender between 2014-2023

Overview of Gender Diversity in BIST Company Boards in 2023

In 2023, out of 517, 179 (34,6%) BIST companies did not include any female directors in their boards compared to 158 (33,3%) companies in 2022. Those companies with all-male boards are listed in Appendix A. **Chart 2.3** presents the breakdown of companies with or without female directors in 2023.

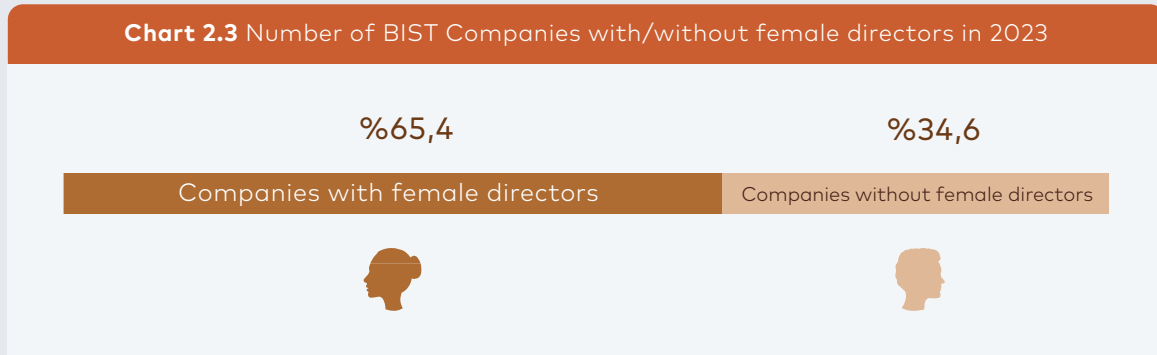

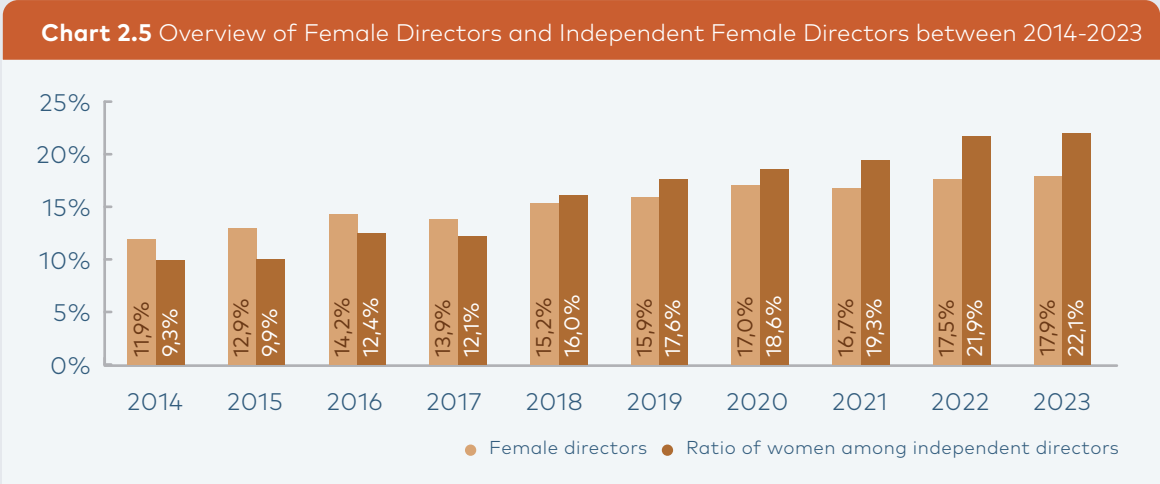

Chart 2.4 demonstrates a change in the ratio of companies with at least one female director between 2014-2023. In 2023, 65.4% of the companies had at least one female board member which has decreased from 66.7% in 2022 to 65.4 in 2023.

Overview of Female Directors in BIST

In 2022, women were elected to 563 seats in the boards of companies listed in BIST. This number represents 17.5% of all directorships, increased from 16.7% in 2021. On the other hand, as shown in **Chart 2.5** below, the ratio of female independent board members to all independent directors increased from 19.3% in 2021 to 21.9% in 2022.

Overview of Family/Shareholder Female-Male Directorships in BIST

In 2023, there are 210 female directors affiliated with controlling shareholders and owner families in BIST compared to 197 in 2022 representing 35% of all female directors in 2022 and 34% in 2023.

Breakdown of Female Directors on BIST Boards

The breakdown of female directors in BIST company boards is presented in **Table 2.2** below. The board seats occupied by professional women have increased from 366 in 2022 to 407 in 2023. The number of female family members has slightly increased from 197 in 2022 to 210 in 2023.

Table 2.2 Number of Female Directors in BIST between 2014-2023

Years	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
Independent Professional	80	83	102	98	131	144	151	172	230	253
Other Professionals	93	101	107	103	99	103	115	120	136	154
Executive	22	23	20	17	16	24	31	37	47	44
Non-executive	71	78	87	86	83	79	84	83	89	110
Family/Shareholder	179	192	191	185	191	188	193	187	197	210
Executive	46	51	53	53	52	51	58	76	78	90
Non-executive	133	141	138	132	139	137	135	111	119	120
+ Total	352	376	399	386	421	435	459	479	563	617

In 2023, out of 617 female directorships, 230 (37.3%) are held by female directors who are non-executive but not independent, whereas 253 (41%) are independent. As shown in Chart 2.7, only 134 (21.7%) of the female directors have executive responsibilities, compared to 22.2% in 2022.

Chart 2.7 Breakdown of Female Directors in BIST in 2023

Chart 2.8 below shows the breakdown of statutory positions of female directors as required by the Capital Markets Board as independent, executive, and non-executive directors.

New Appointments

In 2023, 140 new female directors were appointed to BIST boards, a lower figure than 154 in 2022. Out of 140, 54 are independent, 55 are non-executive (but not independent) and 31 are executive directors. 43 of the newly appointed women are affiliated with controlling families. **Table 2.3** provides an overview of female board appointments and resignations in 2022 and 2023.

Table 2.3 Number and Percentages of New Female Board Member Appointments and Resignations in 2022 and 2023

Appointments*	2022		2023	
	#	%	#	%
New female board appointments	154	-	140	-
New independent female appointments	78	50.7	54	38.6
New non-executive female appointments	53	34.4	55	39.3
Professional non-executive female app.	33	62.3	34	61.8

*% represents the new female appointments

Women and Men in Chairperson/CEO/General Manager Positions on BIST Boards

Only 45 companies have appointed a female chairperson in 2023 corresponding to 8.7 % of all companies. As shown in **Chart 2.9**, 40 of the 45 female chairpersons are affiliated with the controlling families and/or they directly own a significant number of shares. Only 5 professional women were appointed as the board chair again this year compared to 151 professional men.

In 2023, 23 companies have female CEOs who sit on the board, corresponding to only 4.4% of all BIST companies. The number of male CEOs is 225 representing 43.5% of all companies as shown in **Chart 2.10**. Out of 225 male CEOs, 58 have dual roles both as CEO and Chair whereas only 3 women have dual roles as both. 269 companies (52%) did not include their top executives in their board in 2023.

Initial Public Offerings (IPOs) in 2023

During the 2023 reporting period, a total of 45 companies offered its shares to the public, compared to 63 companies in 2022. Notably, the representation of women on the boards of these new publicly listed companies had lower percentage of women on their boards at 13.5% in 2023, compared to 15.5% in 2022. In both periods, roughly 50% of the companies had all-male boards as seen in [Table 2.4](#). The average board size of the newly listed companies is 6, smaller than the 7-average of all listed firms. This picture represents the lack of awareness amongst the investment banks and the issuers about institutional investor and creditor demands related to board diversity.

Table 2.4 Changes in the ratio of women in New Publicly Listed Companies between 2021-2023

	2021	2022	2023
No of Companies	39	63	45
No of the board members	231	367	266
No of female members	30	57	36
% of female members	13.0%	15.5%	13.5%
No of companies without female members	19	32	21

Table 2.5 Independent Directorships between 2021-2023 in New Publicly Listed Companies

	No of independent members		No of independent female members	
2021	65	28,1%	11	16,9%
2022	123	33,5%	24	19,5%
2023	80	30,1%	7	8,8%

Presence of Women on Boards in Different Sectors

Table 2.6 presents an overview of female directors serving on BIST Companies' boards in different sectors. 81.8% and 75.9% of the companies in two major sectors, namely Hotels and Restaurants and secondly Electricity Gas and Water have at least one female on their boards. In 2023, the highest percentage of female directorships is 31.3% in the Agriculture, Wood Products and Fishing, which is followed by 28.6% in the Professional, Scientific, and Technical Activities industry.

Table 2.6 Female Directors in different industries in 2023

	Total # of companies		Companies with Female directors		Total # of directorships		Female directorships	
	#	%	#	%	#	%	#	%

Transportation, Telecommunication and Storage	10	40.0	4	40.0	71	8.5	6	8.5

Composition of Board Committees

All companies have mandatory Audit Committees and Corporate Governance Committees. Some companies have other committees such as the Sustainability Committee. 21.1% of Audit Committee seats and 23.1% of Corporate Governance Committee seats are filled by women as shown in **Table 2.7**. These figures correspond to 211 seats in audit committees, and 256 seats in corporate governance committees which is slightly higher than the number of seats filled by female members in 2023. Also, 234 of 1127 seats in the risk committees are filled by women.

Chart 2.11 presents the progress in gender diversity in board committees over the years. The seats occupied by female directors in audit, corporate governance, and risk committees have increased over the years, especially in 2023.

In 2023, 23.2% of corporate governance committees, 18.2% of audit committees, and 19.5% of Risk Committees had a female chair.

Gender Diversity in Boards in Main BIST Indices

BIST-100

BIST-100 index includes the largest and economically most significant companies in BIST. The changes over the years in the representation of women in these companies are presented in **Table 2.8**. As shown below, the percentage of women on boards of BIST-100 companies is 17.3 %in 2023. The ratio of independent female directors is 25.9% in BIST 100 Companies, higher than 24.2% in 2022.

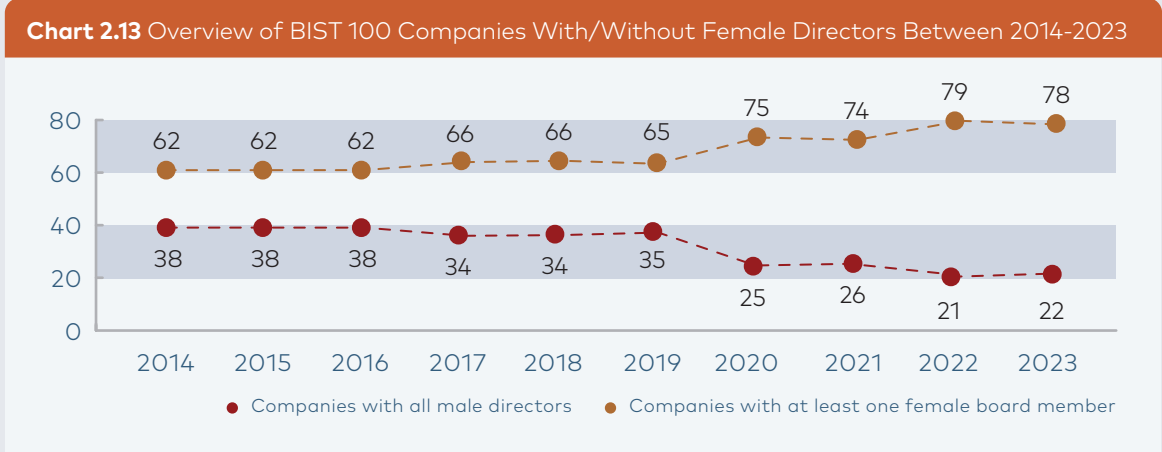

Table 2.8 Changes in the ratio of women in BIST 100 companies between 2018-2023

As shown in **Chart 2.13**, 22 companies in BIST 100 have all male boards in 2023. The largest companies in BIST started to move towards diversity, however, the number of companies with all-male board members have still above 20.

BIST Financial Index, BIST Corporate Governance Index and Sustainability Index

There are 142 companies in BIST Financial Index, 71 companies in Corporate Governance Index and 73 companies in Sustainability Index in 2023. Percentage of female directors in the companies that constitute the Corporate Governance Index has increased from 19,9 % in 2022 to 21.8%. Also, the percentage of female directors in the Financial Index increased from 17.6% in 2022 to 18.6% in 2023. The percentage of female directors in Sustainability Index is 21.6%.

SECTION 3 | WOMEN EMPOWERED BOARD INDEX

In presenting statistics on women on boards in Türkiye, we use the same methodology (as in previous years) explained below.

3.1 Classifying Women Directors

We differentiate female directors who sit on the boards as direct shareholders or representatives of controlling families from professional female directors. The concept of "glass ceiling" in Turkey refers predominantly to professional women. Therefore, we classify woman directors as:

- Directors who are members of the controlling families in family-controlled firms, and/or directors who are direct shareholders
- Professional directors

Furthermore, we classify all woman directors in accordance with the applicable laws and regulations in Türkiye as:

- Executive
- Non-executive (but not independent)
- Independent

Non-executive directors may not qualify for independence when they are affiliated with the controlling shareholders, when they hold significant percentage of shares in the firm, or when they are professionals affiliated with other firms in the business group if the firm belongs to a business group.

3.2 Calculating Diversity

We are interested in "diversity" as well as "female presence". Therefore, we measure gender diversity using Blau's¹ index of heterogeneity. For gender diversity, Blau index can range from zero (when only one gender is represented on the board) to 0.50 (when there are equal numbers of men and women). Gender Diversity Index (GDI) values of BIST MAIN and STAR companies based on Blau are presented in Appendix B, and the top scoring companies are listed in Table 3.1.

3.3 Calculating Woman Power

Power represents the ability to exert influence on decision-making. We define five sources of comparative power as 'influence variables' adopted from Finkelstein's taxonomy²:

¹ Blau, P. M. 1977. Inequality and heterogeneity. New York: Free Press.

² Finkelstein, S. & Hambrick, D. C. 1996. Strategic leadership: Top executives and their effects on organizations. Minneapolis: West Publishing.

- **W** = Presence of Women (percentage of female directors in the board)
- **WBC** = Committee Membership Power (percentage of seats occupied by women in all board committees)
- **WP** = Professional Authority Power (percentage of female directors among all professional directors - professional directors exclude family members and shareholders but include other affiliated professional directors)
- **WI** = Independence Power (percentage of independent female directors among all independent directors)
- **WC** = Chair/CEO Power (percentage of women in chair and CEO positions - this variable takes the value of 0 if both the chair and the CEO are male, 0.5 if the CEO is a woman, 1 if both the chair and the CEO are female).

In the case of a female chair, the variable takes the value of 1 when the CEO is not on the board regardless of the gender.

We then make an adjustment for critical mass:

- **CM** = Adjustment for Critical Mass [when the Number of Women (**N**) on the board is greater than 2, the firm is rewarded by a Critical Mass adjustment value of (N-2)/BS where (**BS**) is the Board size].

Women Empowered Board Index (WEI) is calculated as follows:

$$WEBI = a (W\%) + b (WBC\%) + c (WP\%) + d (WI\%) + e (WC) \quad \text{for } N < 3$$

$$WEBI = a (W\%) + b (WBC\%) + c (WP\%) + d (WI\%) + e (WC) + f (CM) \quad \text{for } N > 2$$

All coefficients are taken as one in the Index calculation. In the future we plan to calculate these coefficients empirically when data set covers a sufficiently long period.

About Sabancı University Corporate Governance Forum

Corporate Governance Forum of Türkiye (CGFT), founded on 1st of March 2003 as a joint initiative of Turkish Industrialists and Businessmen's Association (TUSIAD) and Sabancı University is an interdisciplinary and cross-sectorial initiative hosted by Sabancı Business School. CGFT's outreach work focuses on corporate behaviour and practices around issues that can impact socio-economic welfare. Forum's mission is to contribute to the improvement of the corporate governance framework and practices. Forum strives to achieve its mission by undertaking or commissioning scientific research, encouraging and facilitating dialogue between academicians and practitioners and by active engagement in policy development and practice development initiatives.
